

1. Tick the 2 boxes in front of the server ip and password to prevent mis-writing
2. Put the server address, server port and server password I provided
3. No need to change other tabs
4. Click OK and the software will be minimized to the bottom right corner of the computer.
5. Click OK, After confirming, right click on the software icon (paper airplane icon) in the lower right corner of the computer Taskbar and select "Enable System Proxy".
3. After select "Enable System Proxy", Select Global in Mode option.

- 1.把服务器 ip 和密码前面的那 2 个方框打勾, 防止填错信息
- 2.把我提供的服务器地址, 服务器端口和服务器密码
- 3.其他的位置不需要去改
- 4.点击确定, 登陆器会最小化到电脑的右下角
- 5.鼠标右键单击电脑右下角的纸飞机, 然后鼠标指到: 系统代理模式, 选择: Global 模式
就可以上国外网站了
